

EXHIBIT 8

Live IP Address Lookups

Perform a lookup on any **IP Address** to gain insight into IP Reputation, risk analysis, geo location data, and recent suspicious behavior.

Quick Tip On Scoring Settings – The scoring options below have been set to match the front end [IP Address Lookup \(/free-ip-lookup-proxy-vpn-test/\)](/free-ip-lookup-proxy-vpn-test/) tool. These default settings score IP addresses as lightly as possible, suppressing scores for mixed quality IP addresses. You may notice better results by increasing the **strictness** level or disabling some of the checked settings below.

Get Access To Exclusive Blacklists & Enhanced Scoring

Instantly activate **better detection rates** for botnets, residential proxies, and compromised IP addresses.

- Premium Blacklists and Better Filters for Greater Accuracy
- Improved Residential Botnet & Proxy Detection
- Cancel anytime, no yearly contracts!

[Upgrade To Instantly Activate These Features » \(/user/plans\)](/user/plans)

IP Address

135.26.144.241

Strictness Level

Medium (1 Week Reputation Lookback Period — Level 1)

Allow Public Access Points (less strict)

Allow IP addresses from corporate, university, and other public ranges while still detecting the worst offenders within these IP address blocks.

Score this IP address as a mobile device (less strict)

This feature adjusts the checks we perform to provide better accuracy for mobile IP addresses.

Lighter Penalties for Mixed Quality IP Addresses (less strict)

This feature lowers detection and elevated Fraud Scores for IP addresses shared by good and bad users.

Lookup IP

A query credit will be used for each live lookup.

IP Address Reputation & Risk Details:

Country:	US 
City:	Roseville

Abuse Velocity:	Premium required.
Recent Abuse:	false
Bot Activity:	false
Connection Type:	Premium required.
Time Zone	America/Los_Angeles
Request ID	JYloCClAbp

How Do Free Lookups Compare to Upgraded Lookups?

Free accounts have access to basic blacklists, however these lists often exclude sophisticated fraud and stealthier proxies. All of the IPQS **plan upgrades** (/user/plans) have access to better blacklists that significantly expand reputation checks and detection rates for high risk IPs. Gain access to additional data sets like **Fraud Fusion™**, a community blacklist with confirmed fraud reported by Fortune 500s and the internet's top websites & apps.

Don't let fraudulent IP addresses slip by undetected. **Upgrade your account** (/user/plans) for better accuracy and premium features.
